EDUCATION

Pranveer Singh Institute of Technology, Kanpur B.Tech - Artificial Intelligence and Machine Learning - CGPA - 8.1	2023 – 2027 Kanpur, Uttar Pradesh, India
Dr. Virendra Swarup Public School, Kanpur Intermediate - Percentage - 70	2022 – 2023 Kanpur, Uttar Pradesh, India
Dr. Virendra Swarup Public School, Kanpur Secondary School - Percentage - 84.16	2020 – 2021 Kanpur, Uttar Pradesh, India

SKILLS

Programming Languages: Python, Java, C, SQL

Core Subjects: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

AI & ML: Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), LangChain

Tools & Libraries: Git, GitHub, Linux/Unix, Postman, Pandas, NumPy, Scikit-learn, OpenCV

Data Analytics: Data Processing, Data Validation, Data Cleaning, Data Analysis

PROJECTS

Urban Mobility Analytics System	January 2026 – March 2026
Tech Stack: Python, Pandas, NumPy, LangChain, LLM	
- Processed and analyzed 1,000+ transportation records per day using Python, Pandas, and NumPy, building automated data cleaning and validation workflows for analytics and reporting. - Built an LLM-powered analytics pipeline using LangChain to automatically summarize transportation datasets and generate structured analytical insights, improving reporting efficiency. - Reduced data processing execution time by 25% by optimizing processing logic and developing reusable functions.	
Violence Detection System	December 2025 – January 2026
Tech Stack: Python, OpenCV, Scikit-Learn, NumPy, Deep Learning	
- Created a pipeline in Python that allows efficient processing and classification of more than 500 high-resolution video frames. - Developed a computer vision pipeline using OpenCV and machine learning techniques for automated violence detection through image preprocessing and feature extraction. - Achieved better efficiency in processing and made a contribution to increased detection accuracy by 18%.	
Healthcare Management System	July 2025 – August 2025
Tech Stack: Java, Spring Boot, ReactJS, SQL	
- Implemented backend modules for patient registration and appointment scheduling supporting management of 1,000+ patient records. - Developed and integrated 10+ REST APIs between frontend and backend systems. - Optimized SQL queries, reducing API response time by 25%	

PUBLICATION

Future Trajectories in Digital Twin Research: Architectures, Data Pipelines, and Security
- Research Paper Lead Author 2026 - Researched Digital Twin architectures, data pipelines, synchronization challenges, security frameworks, and AI-driven approaches for intelligent networked systems.

CERTIFICATIONS

- Machine Learning Specialization, Coursera, 2026
- Building LLM Applications With Prompt Engineering, Nvidia, 2025
- Problem Solving Certification, HackerRank, 2024
